**Conditions of Reporting:** 1. The tests are carried out in the lab with the presumption that the specimen belongs to the patient name as identified in the bill/test request form. 2. The test results relate specifically to the sample received in the lab and are presumed to have been generated and transported as per specific instructions given by the physicians/laboratory. 3. The reported results are for the information and interpretation by the referring clinician/doctor only. 4. Some tests are referred to other laboratories to provide a wider test menu to the customer. 5. Results may vary from lab to lab and from time to time for the same parameter and further depending on the particular machine on which the test is performed. 6. onlydiagnostix shall in no event be liable for accidental damages loss, or destruction of specimen which is not attributable to any direct and mala fide act or omission of onlydiagnostix or its employees. 7. This report is not valid for medico-legal purpose. 8. Liability of onlydiagnostix for deficiency of services, or other errors and omissions shall be limited to fee paid by the patient for the relevant laboratory or diagnostic service.

Erythrocyte Sedimentation Rate(ESR) - Automated 19

05 - 20

Westergren Method

#### Clinical Significance

The erythrocyte sedimentation rate (sedimentation rate, sed rate, and ESR for short) is a common hematology test that may indicate and monitor an increase in inflammatory activity within the body caused by one or more conditions such as autoimmune disease, infections or tumors.

#### Instrument:

NOTE:- Test performed on ESL 30 Fully Automated Smart ESR System
